1. Introduction

1.1. Investment Firm

Table 1: Company Information

Company name	Coverdeal Holdings Ltd
CIF Authorization date	26/03/2014
CIF License number	231/14
Company Registration Date	19/03/2012
Company Registration Number	HE303127
Investment Services	
Reception and transmission of orders in relation to one or more financial instruments	
Execution of Orders on Behalf of Clients	
Ancillary Services	
Safekeeping and administration of financial instruments, including custodianship and related services	
Granting credits or loans to one or more financial instruments, where the firm granting the credit or loan is involved in the transaction	
Foreign exchange services where these are connected to the provision of investment services	
Investment research and financial analysis or other forms	

The Company is authorised to provide the aforementioned investment and ancillary services, as applicable for each service, for the following Financial Instruments, in accordance with Part III of the First Appendix of the Investment Services and Activities and Regulated Markets Law of 2017, as amended:

1. Transferable Securities;
2. Money Market Instruments;
3. Units in Collective Investment Undertakings;
4. Options, futures, swaps, forward rate agreements and any other derivative contracts relating to securities, currencies, interest rates or yields, or other derivatives instruments, financial indices or financial measures which may be settled physically or in cash;
5. Options, futures, swaps, forward rate agreements and any other derivative contracts relating to commodities that must be settled in cash or may be settled in cash at the option of one of the parties other than by reason of a default or other termination event;
6. Options, futures, swaps, and any other derivative contract relating to commodities that can be physically settled provided that they are traded on a regulated market, a MTF, or an OTF, except for wholesale energy products traded on an OTF that must be physically settled;
7. Options, futures, swaps, forwards and any other derivative contracts relating to commodities, that can be physically settled not otherwise mentioned in point 6) of this Part and not being for commercial purposes, which have the characteristics of other derivative financial instruments;
8. Derivative instruments for the transfer of credit risk;
9. Financial contracts for differences

10. Options, futures, swaps, forward-rate agreements and any other derivative contracts relating to climatic variables, freight rates or inflation rates or other official economic statistics that must be settled in cash or may be settled in cash at the option of one of the parties other than by reason of default or other termination event, as well as any other derivative contracts relating to assets, rights, obligations, indices and measures not otherwise mentioned in this Part, which have the characteristics of other derivative financial instruments, having regard to whether, inter alia, they are traded on a regulated market, OTF, or an MTF;

Moreover, based on Article 95 (1) of the Regulation (EU) 575/2013 (hereinafter the “Regulation” or “CRR”), the Company is categorised as “Limited Licence” CIF with minimum/initial capital requirement of €125,000.

1.2. Purpose

The present report is prepared by Coverdeal Holdings Ltd (the “Company”), a Cyprus Investment Firm (“CIF”) authorized and regulated by the Cyprus Securities and Exchange Commission (the “CySEC”, the “Commission”) under the license number 231/14 and operates in harmonisation with the Markets in Financial Instruments Directive (“MiFID II”).

In accordance with Regulation (EU) No. 575/2013 (the “Capital Requirements Regulation”, “CRR”) , which was introduced in late 2014, the Company is required to disclose information relating to its risk exposure and management, capital structure, capital adequacy as well as the most important characteristics of the Company’s corporate governance including its remuneration system. The scope of this report is to promote market discipline and to improve transparency of market participants.

This document is updated and published annually; it will, however, be published more frequently if there are significant changes to the business (such as changes to the scale of operations, range of activities, etc.). CySEC is responsible for implementing and enforcing the European Capital Requirements Directive (‘CRD’), a capital adequacy framework consisting of three ‘pillars’:

- **Pillar I:** sets minimum capital requirements comprising of base capital resources requirements; credit and market risk capital requirements; and the fixed overhead requirement.
- **Pillar II:** requires firms to undertake an overall internal assessment of their capital adequacy, taking into account all the risks which the firm is exposed to and whether additional capital should be held to cover risks not adequately covered by Pillar I requirements. This is achieved through the Internal Capital Adequacy Assessment Process (“ICAAP”).
- **Pillar III:** complements Pillars I and II and improves market discipline by requiring firms to disclose information on their capital resources and Pillar I capital requirements, risk exposures and their risk management framework.

The 2017 Pillar III Disclosures Report sets out both quantitative and qualitative information required in accordance with Part 8 of the CRR and in particular articles 431 to 455, which set the requirements of the disclosures. According to the CRR, the risk management disclosures should be included in either the financial statements of the CIF if these are published, or on their websites. In addition, these disclosures must be verified by the external auditors of the CIF. The CIF will be responsible to submit its external auditors' verification report to CySEC. The Company has included its risk management disclosures as per the Directive on its website as it does not publish its financial statements. Verification of these disclosures has been made by the external auditors and sent to CySEC.

The information contained in the Pillar III Market Discipline and Disclosure Report is audited by the Firm's external auditors and published on the Company's website at www.coverdeal.eu on an annual basis.

Furthermore, the Board of Directors and the Senior Management have the overall responsibility for the internal control systems in the process of capital adequacy assessment and they have established effective processes to ensure that the full spectrum of risks faced by the Company is properly identified, measured, monitored and controlled to minimize adverse outcomes.

The Company's business effectiveness is based on the guidelines of the risk management policies and procedures put in place. The Board of Directors, Internal Audit, Risk Manager, Compliance and Anti-Money Laundering Officer control and supervise the overall risk system so that all units charged with risk management perform their roles effectively on a continuous basis.

As with all Investment Firms, the Company is exposed to a variety of risks and in particular to credit risk, market risk and operational risk. More information can be found in the sections below.

The Company is not preparing consolidated financial statements and is making the disclosures on an individual basis.

1.3. The Company

Coverdeal Holdings Ltd as a CIF operates in a number of European countries, and has one branch in Czech Republic. The Company offers predominantly trading in CFDs on FOREX pairs but also on different other underlying instruments such as Commodities, Stocks, Futures, and Bonds.

The Company has a stable business model and this is reflected in:

- A well-balanced capital allocation between the Company's operations.
- A geographically balanced model with a high percentage of revenues.

The Company's growth strategy focuses on its existing areas of expertise and the quality of its customer base. The Company strives for sustainable profitability consistent with its cost of capital and a balanced business model. To this end, the Company:

- Seeks to contain the volatility of its results
- Calibrates its capital ratio to ensure a significant safety margin relative to the minimum regulatory requirements
- Monitors the stability and diversification of its funding sources
- Ensures sufficient resilience in scenarios of liquidity shortages
- Tightly controls its foreign-exchange risks

The Company aims to maintain a diversified customer base.

The Company ensures that compliance rules are rigorously respected, especially in the area of anti-money laundering and counterterrorism financing. The Company monitors the loyalty of the behaviour of its employees with regard to customers and all its stakeholders, as well as the integrity of its investment and financial practices.

The Company considers its reputation to be an asset of great value that must be protected to ensure its sustainable development. The prevention and detection of the risk of harm to its reputation are integrated within all the Company's operating practices. The Company's reputation is protected by making its employees aware of the values of responsibility, ethical behaviour and commitment.

1.4. Regulatory Supervision

The minimum capital requirements as at 31 December 2017 for the CRD IV were calculated in accordance with the 'Pillar I' rules as set out by the Laws and Regulations, published by the CySEC. All CIFs under CySEC's authority must meet the requirements with respect to capital adequacy and market discipline, which are comprised by the following:

- Law 144(I)/2007 has been replaced by Law 87(I)/2017 (hereinafter, the "**Law**") for the purpose of harmonization with European Directive 2 2014/65/EU ("**MIFID II**") which applies in the Republic as of 3 January 2018.
- Regulation (EU) No. 575/2013 – Capital Requirements Regulation
- Regulation (EU) No. 648/2012 – European Markets Infrastructure Regulation
- Directive 2013/36/EU on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms, amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC – Capital Requirements Directive IV
- Directive DI144-2014-14: For the prudential supervision of Investment Firms
- Directive DI144-2014-15: On the discretions of CySEC arising from Regulation (EU) No. 575/2013

2. Governance and Risk Management

Implementing a high-performance and efficient risk management structure is a critical undertaking for the Company, in all businesses, markets and regions in which it operates, as are maintaining a strong risk culture and promoting good corporate governance. The Company's risk management, supervised at the highest level is compliant with the regulations enforced by CySEC and the European regulatory framework.

The implementation of a high-performance and efficient risk management system is a critical undertaking for the Company, as well as the balance between strong risk culture and the development of its activities.

The Enterprise Risk Management programme ("ERM") is closely monitored at the highest level of the Company: it is supervised by Management body, with the participation of members of the Executive Committee, and is the subject of regular reporting to the Board of Directors ("BoD").

The first phase of the ERM programme was carried out between 2016 and 2017 (year-end). It has improved the consistency and effectiveness of the Company's risk management system by fully integrating risk prevention and management within the day-to-day management of the Company's operations. In particular, the Board of Directors ensures the adequacy of the Company's risk management infrastructure, monitoring changes in the cost of risk and approves the risk limits for market risks.

2.1. Types of Risks

Given the diversity and evolution of the Company's activities, risk management involves the following main categories:

- **Credit and Counterparty risk (including Country risk):** Risk of losses arising from the inability of the Company's customers, issuers or other counterparties to meet their financial commitments. Credit risk includes Counterparty risk linked to market transactions (Replacement risk) and securitisation activities. In addition, Credit risk may be further amplified by Concentration risk, which arises from a large exposure to a given risk, to one or more counterparties, or to one or more homogeneous groups of counterparties; Country risk arises when an exposure (loan, security, guarantee or derivative) becomes liable to negative impact from changing political, economic, social and financial conditions in the country of exposure.
- **Market risk:** Risk of a loss of value on financial instruments arising from changes in market parameters, the volatility of these parameters and correlations between them. These parameters include but are not limited to exchange rates, interest rates, and the price of securities (equity, bonds), commodities, derivatives and other assets, including real estate assets.
- **Operational risks (including Accounting and Environmental risks):** Risk of losses arising from inadequacies or failures in internal procedures, systems or staff, or from external events, including low-probability events that entail a high risk of loss.

- **Liquidity risk:** Risk of the Company not being able to meet its cash or collateral requirements as they arise and at a reasonable cost.
- **Compliance risk (including Legal and Tax risks):** Risk of legal, administrative or disciplinary sanction, or of material financial losses, arising from failure to comply with the provisions governing the Company's activities.
- **Reputational risk:** Risk arising from a negative perception on the part of customers, counterparties, shareholders, investors or regulators that could negatively impact the Company's ability to maintain or engage in business relationships and to sustain access to sources of financing.
- **Strategic risk:** Risks inherent in the choice of a given business strategy or resulting from the Company's inability to execute its strategy.
- **Business risk:** Risk of lower than anticipated profits or experiencing losses rather than a profit.

2.2. Risk Appetite

The Company defines Risk Appetite as the level of risk, by type and by business that the Company is prepared to incur given its strategic targets. Risk Appetite is defined using both quantitative and qualitative criteria.

The Risk Appetite Framework takes into account earnings sensitivities to business cycles and credit, market and operational events. The Risk Appetite is one of the strategic oversight tools available to the Management bodies. It underpins the budgeting process and draws on the Internal Capital Adequacy Assessment Process ("ICAAP"), which is also used to ensure capital adequacy under stressed economic scenarios.

Furthermore, the positioning of the business in terms of risk/return ratio as well as the Company's risk profile by type of risk are analysed and approved by the BoD. The Company's risk appetite strategy is implemented by the Senior Management in collaboration with the BoD and applied by all divisions through an appropriate operational steering system for risks, covering:

- Governance (decision-making, management and supervisory bodies)
- Management (identification of risk areas, authorisation and risk-taking processes, risk management policies through the use of limits and guidelines, resource management)
- Supervision (budgetary monitoring, reporting, leading risk indicators, permanent controls and internal audits)

Essential indicators for determining the Risk Appetite and their adaptations are regularly supervised over the year in order to detect any events that may result in unfavourable developments on the Company's risk profile. Such events may give rise to remedial action, up to the deployment of the recovery plan in the most severe cases.

The Board of Directors reviews and approves the risk appetite and capacity on an annual basis, with the aim of ensuring that they are consistent with the Company’s strategy, business and regulatory environment and stakeholders’ requirements.

The Risk Appetite covers four primary areas:

Risk Category	Risk Appetite
Regulatory Capital	Company’s appetite for Regulatory risk is low.
Operational	Company’s appetite for Operational risk is low. Operational risk is one of the major risks that the company is facing where errors, fraud or disruptions of service can have monetary or reputational cost. The Company monitors operational risk through a range of controls which are designed for the early identification of operational risks. Also, the Company maintains and regularly updates a risk register, as part of the ICAAP process.
Reputational	Company’s appetite for Reputation risk is low. Reputational risk occurs when negative publicity arising from customers, counterparties, shareholders or regulators regarding the company’s business practices affects the company’s ability to maintain existing or establish new business relationships and leads to a loss of revenue or litigation.
Legal and compliance risk (Regulatory Risk)	Company’s appetite for Legal and Compliance risk is low. Company will uphold its legal obligation to ensure a safe and sound banking system and fair access to financial services for consumers. Legal risk considerations are multi-faceted, complex and span the entirety of Company’s operations.

2.3. Internal Capital Adequacy Assessment Process (“ICAAP”)

The ICAAP requires institutions to identify and assess risks not adequately covered in Pillar I, maintain sufficient capital to face these risks and apply appropriate risk-management techniques to maintain adequate capitalization on an ongoing and forward looking basis, i.e., internal capital supply to exceed internal capital demand.

The Company maintains compliance with the ICAAP as required under Pillar II of Basel III and its local implementation in Cyprus, through risk management and governance framework, methodologies, processes and infrastructure.

The Company has documented ICAAP in an ICAAP Manual. The Company has produced the ICAAP report which has been submitted to CySEC with the request for extension of the authorisation. The ICAAP is being updated and upon CySEC’s request it shall be submitted to CySEC.

2.4. Stress Tests

Stress testing is a key risk management tool used by the Company to rehearse the business response to a range of scenarios, based on variations of market, economic and other operating environment conditions. Stress tests are performed for both internal and regulatory purposes and serve an important role in:

- Understanding the risk profile of the Company
- The evaluation of the Company's capital adequacy in absorbing potential losses under stressed conditions: This takes place in the context of the Company's ICAAP on an annual basis
- The evaluation of the Company's strategy: Senior management considers the stress test results against the approved business plans and determines whether any corrective actions need to be taken. Overall, stress testing allows senior management to determine whether the Company's exposures correspond to its risk appetite
- The establishment or revision of limits: Stress test results, where applicable, are part of the risk management processes for the establishment or revision of limits across products, different market risk variables and portfolios

The ultimate responsibility and ownership of the Company's stress testing policy rests with the Board of Directors. If the stress testing scenarios reveal vulnerability to a given set of risks, the management should make recommendations to the Board of Directors for mitigation measures or actions. These may vary depending on the circumstances and include one or more of the following:

- Review the overall business strategy, risk appetite, capital and liquidity planning
- Review limits
- Reduce underlying risk positions through risk mitigation strategies
- Consider an increase in capital
- Enhance contingency planning

The Company performs financial modelling and stress analysis on a frequent basis especially when year-end financial results are available or when it revises its business plan.

2.5. Diversity Policy

Diversity is increasingly seen as an asset to organizations and linked to better economic performance. It is an integral part of how the Company does business and imperative to commercial success.

The Company recognizes the value of a diverse and skilled workforce and management body, which includes and makes use of differences in the age, skills, experience, background, race and gender between them. A balance of these differences will be considered when determining the optimum composition.

The Company is committed to creating and maintaining an inclusive and collaborative workplace culture that will provide sustainability for the organization into the future. This is also documented as best practises in the Corporate Governance Code of many EU countries.

In line with the recent changes in the regulatory reporting framework, the Company is in the process of establishing a dedicated diversity policy in relation to the Management body.

2.6. Board Recruitment

One of the BoD's main responsibilities is to identify, evaluate and select candidates for the Board and ensure appropriate succession planning. The Senior Management is assigned the responsibility to review the qualifications of potential director candidates and make recommendations to the BoD.

The persons proposed for the appointment should have specialised skills and/or knowledge to enhance the collective knowledge of the BoD and must be able to commit the necessary time and effort to fulfil their responsibilities.

Factors considered in the review of potential candidates include:

- Specialised skills and/or knowledge in accounting, finance, banking, law, business administration or related subject
- Knowledge of and experience with financial institutions (“fit-and-proper”)
- Integrity, honesty and the ability to generate public confidence
- Knowledge of financial matters including understanding financial statements and financial ratios
- Demonstrated sound business judgment
- Risk management experience

In line with the recent changes in the regulatory reporting framework, the Company is in the process of establishing a dedicated recruitment policy in relation to the BoD.

2.7. Remuneration

Remuneration refers to payments or compensations received for services or employment. The remuneration system consists of the base salary only.

The Company has established a remuneration policy, which its purpose is to set out the remuneration practices of the Company taking into consideration the salaries and benefits of the staff, in accordance with the laws and regulations.

The design of the Policy is approved by the Board of Directors. The people who effectively direct the business are responsible for the implementation of remuneration policies and practices and for preventing and dealing with any relevant risks, that remuneration policies and practices can create.

The Company has taken into account its size, internal organisation and the nature, the scope and the complexity of its activities and decided not to establish a specific remuneration committee.

No remuneration is payable under deferral arrangements (with vested or unvested portions).

During 2017, the Company's remuneration system is concerned with practices of the Company for those categories of staff whose professional activities have a material impact on its risk profile, i.e. the Senior Management, members of the Board of Directors and the Heads of the Departments; the said practices are established to ensure that the rewards for the 'Executive Management' provide the right incentives to achieve the key business aims.

To avoid possible conflict of interest the total remuneration of Employees and Directors consists of fixed remuneration only.

Table 2: Aggregate Quantitative Information on Remuneration

	No. of staff	Fixed EUR'000	Variable EUR'000	Non-cash EUR'000	Total EUR'000
Senior Management (incl. non-executive directors)	4	96	-	-	96
Other staff whose actions have a material impact on the risk profile of the Institution	3	68	-	-	68
Total	7	164	-	-	164

Companies are required to disclose the number of natural persons that are remunerated €1mln or more per financial year, in pay brackets of €1mln, including their job responsibilities, the business area involved and the main elements of salary, bonus, long-term award and pension contribution. Nevertheless, currently there are no natural persons at the Company that are remunerated €1mln or more per financial year and as such the above disclosure is not applicable to the Company.

2.8. Directorships held by Members of the Management Body

In 2017, the members of the Management body of the Company, given their industry experience, have been taking seats in other company boards. In line with this, the following table indicates the number of positions that each member holds:

Table 3: Directorships held by Members of the Management Body

Name	Position in the CIF	Directorships (Executive)	Directorships (Non-Executive)
Diana Jomantaite	Executive Director, Money Laundering Compliance Officer	1	-
Gabriela Antoniou	Executive Director - CEO	1	-
Panayiotis Kallis	Independent Non-Executive Director	1	2
Lucas Kokkinos	Independent Non-Executive Director	-	3

2.9. Reporting and Control

In line with the requirements set out in the Cyprus Investment Firms Law and subsequent Directives, the Company has been able to maintain a good information flow to the Management body, as it can be seen below:

Table 4: Periodic Reporting Summary

Report Name	Report Description	Owner	Recipient	Frequency	Due Date
Annual Compliance Report	To inform the Senior Management & the BoD of the Company regarding the Performance of Compliance function during the year	Compliance Officer	BoD, CySEC	Annual	30/04/2017
Annual Internal Audit Report	To inform the Senior Management & the BoD of the Company regarding the Internal Auditor during the year	Internal Auditor	BoD, CySEC	Annual	30/04/2017
Annual Risk Management Report	Represents the work & activities undertaken by the Risk Manager during the year	Risk Manager	BoD, CySEC	Annual	30/04/2017
Pillar III Disclosures (Market Discipline and Disclosure)	The Company is required to disclose information regarding its risk management, capital structure, capital adequacy and risk exposures	Risk Manager	BoD, CySEC, Public	Annual	30/04/2017
Financial Reporting	It is a formal record of the financial activities of the CIF	External Auditor	BoD, CySEC	Annual	30/04/2017

3. Capital Management and Adequacy

3.1. The Regulatory Framework

In response to the financial crisis of recent years, the Basel Committee, mandated by the G20, has defined the new rules governing capital and liquidity aimed at making the financial sector more resilient. The new Basel III rules were published in December 2010. They were translated into European law by a directive (CRDIV) and a regulation (CRR) which entered into force on 1st January 2014.

The general framework defined by Basel III is structured around three pillars, as in Basel II:

- **Pillar I:** sets the minimum solvency requirements and defines the rules that institutions, that are required to comply with the regulation, must use to measure risks and calculate associated capital requirements, according to standard or more advanced methods
- **Pillar II:** relates to the discretionary supervision implemented by the competent authority, which allows them – based on a constant dialogue with supervised credit institutions – to assess the adequacy of capital requirements as calculated under Pillar I, and to calibrate additional capital requirements with regard to risks
- **Pillar III:** encourages market discipline by developing a set of qualitative or quantitative disclosure requirements which will allow market participants to make a better assessment of a given institution's capital, risk exposure, risk assessment processes and, accordingly, capital adequacy

In terms of capital, the main new measures introduced to strengthen institutions' solvency were as follows:

- The complete revision and harmonisation of the definition of capital, particularly with the amendment of the deduction rules, the definition of a standardised Common Equity Tier 1 (or CET1) ratio, and new Tier 1 capital eligibility criteria for hybrid securities.
- new capital requirements for the counterparty risk of market transactions, to factor in the risk of a change in CVA (Credit Value Adjustment) and hedge exposures on the central counterparties (CCP).
- The set-up of capital buffers that can be mobilised to absorb losses in case of difficulties. The new rules require institutions to create a conservation buffer and a countercyclical buffer to preserve their solvency in the event of adverse conditions.
- Requirements related to capital buffers gradually entered into force as from 1st January 2016, for full application by January 2019.
- The set-up of restrictions on distributions, relating to dividends, Additional Tier 1 instruments and variable remuneration, via the maximum distributable amount (MDA) mechanism. At end-2015, the European Banking Authority (EBA) issued an opinion to clarify that the MDA should be applied when an institution no longer complies with its CET1 ratio requirements, including those of Pillar II and capital buffers.

- In addition to these measures, there will be measures to contain the size and consequently the use of excessive leverage. To this end, the Basel Committee defined a leverage ratio, for which the definitive regulations were published in January 2014. The Basel leverage ratio compares the institution's Tier 1 capital to the on- and off-balance sheet items, with restatements for derivatives and pensions. Full scope institutions have been obliged to publish this ratio since 2015. By 2018, regulators will decide whether it is relevant to set a minimum requirement applicable to all institutions.

From a regulatory perspective, the Law 144(I)/2007 has been replaced by Law 87(I)/2017 for the purpose of harmonization with European Directive 2014/65/EU ("MIFID II") which applies to Cypriot investment firms (CIFs), market operators, data reporting service providers (DRSP), and third-country firms providing investment services or activities through the establishment of a branch in the Republic as of 3 January 2018.

In December 2017 the European Commission adopted *a proposal* for a regulation and a proposal for a directive to amend the current EU prudential rules for investment firms. The aim of the review is to introduce more proportionate and risk-sensitive rules for investment firms. Under these proposals, the vast majority of investment firms in the EU would no longer be subject to rules that were originally designed for banks. At the same time, the largest and most systemic investment firms would be subject to the same regime as European banks.

The two acts would amend the existing prudential framework for investment firms set out in the capital requirements directive and regulation (CRD IV/CRR) and in the markets in financial instruments directive and regulation (MiFID2/MiFIR).

3.2. Regulatory Capital

According to the International Financial Reporting Standards (IFRS), the Company's regulatory capital consists of Common Equity Tier 1.

Common Equity Tier 1 Capital (CET1 Capital)

According to CRR/CRDIV regulations, Common Equity Tier 1 capital is made up primarily of the following:

- Ordinary shares (net of repurchased shares and treasury shares) and related share premium accounts
- Retained earnings
- Other reserves
- Minority interest limited by CRR/CRDIV

Deductions from Common Equity Tier 1 capital essentially involve the following:

- Estimated dividend payment
- Goodwill and intangible assets, net of associated deferred tax liabilities
- Unrealised capital gains and losses on cash flow hedging
- Deferred tax assets on tax loss carry forwards
- Deferred tax assets resulting from temporary differences beyond a threshold
- Any positive difference between expected losses on customer loans and receivables, risk-weighted using the standardised approach, and the sum of related value adjustments and collective impairment losses
- Expected loss on equity portfolio exposures
- Value adjustments resulting from the requirements of prudent valuation

3.3.Solvency Ratio (Capital Ratio or Capital Adequacy Ratio)

The solvency ratio is set by comparing the institutions' equity with the sum of risk-weighted assets for credit risk and the capital requirement multiplied by 12.5 for market risk and operational risk.

Since 1st January 2014, the new regulatory framework sets minimum requirements to be met for the CET1 ratio and the Tier 1 ratio. For 2015, the minimum requirement for CET1 was 4% and that of Tier 1 5.5%, excluding the Pillar II requirement. The total equity requirement, including CET1, AT1 and Tier 2 equity, was set at 8%. In 2017, the minimum requirement for CET1 was 4.5%, and that of Tier 1 6% with an overall ratio of 8% (including Tier 2).

3.4.Capital Management

Capital management is implemented by the Senior Management. As part of managing its capital, the Company ensures that its solvency level is always compatible with the following objectives:

- Maintaining its financial solidity and respecting the Risk Appetite targets
- Preserving its financial flexibility to finance organic growth
- Adequate allocation of capital among the various business lines according to the Company's strategic objectives
- Maintaining the Company's resilience in the event of stress scenarios
- Meeting the expectations of its various stakeholders: supervisors, debt and equity investors, rating agencies, and shareholders

The Company determines its internal solvency targets in accordance with these.

In line with the above, the Company is obligated to calculate and report on a quarterly basis (see section on *Reporting and Control*), under CRD, its credit risk, market risk and fixed overhead requirements (the capital requirement for the Company is calculated as the higher of total fixed overhead requirement and the sum of the total credit risk and market risk requirements) the result of which, i.e. solvency/capital ratio, needs to be above 8% (Calculated based on the section above) at all times.

Based on Article 95 (1) of the Regulation (EU) 575/2013 the Company is categorised as the Company categorised as “Limited Licence” CIF with minimum/initial capital requirement of €125,000. In addition, to holding eligible capital of at least one-quarter of the fixed overheads of the previous year according to Article 97 (1) of the CRR, CIFs with “Limited Licence” have to calculate their total risk exposure based on fixed overheads. As per Regulation for “Limited Licence” CIFs, the Company has adopted the Standardised Approach to the calculation of Pillar I minimum capital requirements. The Total Risk Exposure Amount for “Limited Licence” CIFs is the greater of the Total risk exposure amount (excluding Operational Risk) and the Fixed Overhead of the preceding year (or projected expenses as applicable) (x 12.5 x 25%).

At 31st December 2017, the Total Capital ratio of the Company was **45.89%** with total risk-weighted assets of **EUR763 thousand**.

3.5. Leverage Ratio

The Company steers its leverage effect according to the CRR leverage ratio rules, as amended by the delegated act of 10th October 2014. Steering the leverage ratio means both calibrating the amount of Tier 1 capital (the ratio's numerator) and controlling the Company's leverage exposure (the ratio's denominator) to achieve the target ratio levels that the Company sets for itself.

The Company aims to maintain a leverage ratio that is significantly higher than the 3% minimum in the Basel Committee's recommendations. The leverage ratio is in an observation phase in order to set the minimum requirements. Once they have been set, the Company's target will be adjusted as needed.

At the end of 2017 the Company's leverage ratio was 41.89% compare to 50.20% in 2016.

Table 8: Leverage ratio common disclosure

Total on-balance sheet exposures (excluding derivatives, SFTs, and exempted exposures)	783,501

4. Credit Risk

Credit risk corresponds to the risk of losses arising from the inability of the Company's customers, issuers or other counterparties to meet their financial commitments.

The Company's credit risk mainly arises:

- By the Company's deposits in credit and financial institutions
- By assets mainly held from debtors or prepayments made

The Company follows the Standardized Approach under Pillar I for calculating its Credit Risk Capital Requirements, as specified in CRR. It categorizes the assets in respect to their exposure class and uses the Credit Step methodology to determine its respective Risk Weights (RW).

The Company follows both regulatory and compliance oriented credit risk mitigation ("CRM") strategies in order to minimize the possibility of occurrence of this risk, such as:

- All Client funds are held in segregated accounts, separated from Company's funds.
- The Company maintains regular credit review of counterparties, identifying the key risks faced and reports them to the Board of Directors, which then determines the firm's risk appetite and ensures that an appropriate amount of capital is maintained.
- In order to maintain its Credit risk to the minimum, the Company is using EU credit institutions for safekeeping of funds and always ensures that the banks it cooperates with have high ratings based on top credit rating agencies (Moody's, S&P or Fitch), it frequently monitors their compliance with the EU regulatory framework and diversifies the funds over several credit institutions thus mitigating the risk exposure efficiently.

Further to the above, the Company has policies to diversify credit risk and to limit the amount of credit exposure to any particular counterparty in compliance with the requirements of the Regulation (EU) No. 575/2013.

Concentration Risk

For the purposes of calculating large exposures, exposures mean any asset or off-balance sheet item if any without application of the risk weights or degrees of risk there provided for. The Company is not subject to the Large Exposures regime, in accordance with Article 388 of the CRR due to the fact that it is a "Limited Licence" CIF (under Articles 95(1) of the CRR).

Nevertheless, according to Directive DI144-2014-14 for the Prudential Supervision of Investment Firms, Paragraph 61, Limitations on exposures to directors and shareholders, a CIF is not allowed to have exposures to a director more than 1% and to a shareholder that is not an institution, more than 2% of its eligible capital. Exposures to shareholders and directors are monitored and kept within the limits. Any potential concentration limit breach would be managed over time by reducing exposures.

The Company is actively trying to reduce its Concentration Risk by diversifying its Credit Exposure to countries other than Cyprus and to Credit and Financial Institutions outside Cyprus.

4.1. External Ratings

For the purpose of calculating the capital requirements of the Company, mainly under the credit risk requirement, the external credit ratings from **Moody's Analytics** have been applied for the exposure classes listed below:

- Exposures to central governments or central banks
- Exposures to institutions
- Exposures to corporates

The general association with each credit quality step complies with the standard association published by CySEC as follows:

Credit Quality Step	Moody's Rating	Institution Risk Weight (Below 3 months)	Institution Risk Weight (Above 3 months)	Sovereigns Risk Weight	Corporate Risk Weight
1	Aaa to Aa3	20%	20%	0%	20%
2	A1 to A3	20%	50%	20%	50%
3	Baa1 to Baa3	20%	50%	50%	100%
4	Ba1 to Ba3	50%	100%	100%	100%
5	B1 to B3	50%	100%	100%	150%
6	Caa1 and below	150%	150%	150%	150%

For exposures to regional governments or local authorities, public sector entities and institutions, the external ratings are applied in the following priority (i) Issue/Exposure (ii) Issuer/Counterparty (iii) Sovereign.

For exposures to central governments or central banks and corporates the external ratings are applied in the following priority (i) Issue/Exposure (ii) Issuer/Counterparty.

Please note that the external ratings are not taken into account where exceptions or discretions as per the CRR apply.

4.2. Quantitative Information

The credit exposures in this section are measured using the standardized approach. Exposures are broken down by sectors and obligor ratings.

At 31st December 2017, the Company's credit risk capital requirement amounted to **EUR38thousand** (Total Credit Risk exposure amounted to **EUR480 thousand**).

Table 9: Asset Class Breakdown of Net Credit Risk Exposure and Minimum Capital Requirement as at 31 December 2017

Asset Class	Net value of exposures at the end of the period - EUR	Minimum capital requirement EUR

5. Market Risk

Market risk corresponds to the risk of a loss of value on financial instruments arising from changes in market parameters, the volatility of these parameters and correlations between them. These parameters include but are not limited to exchange rates, interest rates, and the price of securities (equity, bonds), commodities, derivatives and other assets, including real estate assets.

As mentioned above, in the context of Pillar I, market risk mainly arises through:

Position Risk: It refers to the probability of loss associated with a particular trading/security (long or short) position due to price changes.

Interest rate risk: The risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Commodities Risk: It refers to the uncertainties of future market values and of the size of the future income, caused by the fluctuation in the prices of commodities. These commodities may be oil, metals, gas, electricity etc.

Foreign Exchange Risk: It is a financial risk that exists when a financial transaction is denominated in a currency other than the base currency of the Company. The foreign exchange risk in the Company is effectively managed by the establishment and control of foreign exchange limits, such as through the establishment of maximum value of exposure to a particular currency pair as well as through the utilization of sensitivity analysis.

The Company monitors these exposures on a daily basis and has policies to minimize its market risk exposures which are in accordance with the CRR.

In 2017, the Company's market risk mainly emanated from foreign exchange fluctuations which affect the Company's deposits in foreign currencies.

5.1. Quantitative Information

The Company's capital requirements related to market risk are mainly determined using the standardized approach.

The Company's total capital requirement as at 31 December 2017 amounted to **EUR17 thousand** (Total Market Risk exposure amounted to **EUR213 thousand**).

Disclosure and Market Discipline Report 2017

Table 15: Market risk capital requirements

	RWAs EUR	Capital Requirements EUR
Foreign exchange risk	213,149	17,052

<i>GBP</i>	349	28
Equity risk	-	-
Interest rate risk	-	-
Commodity risk	-	-
Total	213,149	17,052

6. Operational Risk

Operational risks (including accounting and environmental risks) correspond to the risk of losses arising from inadequacies or failures in internal procedures, systems or staff, or from external events, including low-probability events that entail a high risk of loss. This section describes the monitoring of the Company's operational risk, in addition to providing an analysis of the Company's operational risk profile and regulatory capital requirements.

The Company has developed processes, management tools and a control infrastructure to enhance the Company-wide control and management of the operational risks that are inherent in its various activities. These include, among others, general and specific procedures, permanent supervision, business continuity plans and functions dedicated to the oversight and management of specific types of operational risks, such as fraud, risks related to external service providers, legal risks, information system security risks and compliance risks.

In order to control the exposure to operational risks, the management has established two key objectives:

- To minimise the impact of losses suffered, both in the normal course of business (small losses) and from extreme events (large losses).
- To improve the effective management of the Company and strengthen its brand and external reputation.

The Company recognises that the control of operational risk is directly related to effective and efficient management practices and high standards of corporate governance.

To that effect, the management of operational risk is geared towards:

- Maintaining a strong internal control governance framework.

Disclosure and Market Discipline Report 2017

- Managing operational risk exposures through a consistent set of processes that drive risk identification, assessment, control and monitoring.

The Company implements the below Operational Risk Mitigation Strategies in order to minimize its Operational Risk Exposure:

- The development of operational risk awareness and culture.
- The provision of adequate information to the Company's management, at all levels, in order to facilitate decision making for risk control activities.
- The implementation of a strong system of internal controls to ensure that operational losses do not cause material damage to the Company and have a minimal impact on profitability and objectives.
- The improvement of productivity, efficiency and cost effectiveness, with an objective to improve customer service and protect shareholder value.
- Established a "four-eye" structure and board oversight. This structure ensures the separation of power regarding vital functions of the Company namely through the existence of a Senior Management. The Board further reviews any decisions made by the Management while monitoring their activities;
- Detection methods are in place in order to detect fraudulent activities;
- Comprehensive business contingency and disaster recovery plan.

The Senior Management employs specialized tools and methodologies to identify, assess, mitigate and monitor operational risk. These specialized tools and methodologies assist operational risk management to address any control gaps. To this effect, the following are implemented:

- Incident collection
- Key Risk Indicators
- Business Continuity Management
- Training and awareness

6.1. Quantitative Information

For the calculation of operational risk in relation to the capital adequacy returns, the Company now uses the fixed overhead requirement, which is only taken into account if the summation of credit and market risk falls below a calculated limit.

Based on the relevant calculations the Company's additional capital in respect to operational risk is EUR2 thousand, while the exposure due to the additional fixed overheads is EUR22 thousand, compared to no capital requirement due to additional fixed overhead exposure at the year-end 2016.

7. Liquidity risk

Liquidity risk corresponds to the risk of the Company not being able to meet its cash or collateral requirements as they arise and at a reasonable cost.

The Company's primary objective is to ensure the funding of its activities in the most cost-effective way by managing liquidity risk and adhering to regulatory constraints. The liquidity system aims at providing a balance sheet framework with assets and liabilities target structure that is consistent with the risk appetite defined by the Board of Directors:

- The assets structure should allow the businesses to develop their activities in a way that is liquidity-efficient and compatible with the target liabilities structure.
- The liabilities structure is based on the ability of the businesses to collect financial resources from customers and the ability of the Company to sustainably raise financial resources on the markets, in accordance with its risk appetite.

The principles and standards applicable to the management of liquidity risks are defined by the Company's governing bodies, whose duties in the area of liquidity are listed below:

- The Company's Board of Directors (i) establishes the level of liquidity risk tolerance as part of the Risk Appetite exercise, (ii) meets regularly to examine the Company's liquidity risk situation, on a quarterly basis.
- The Senior Management (i) sets budget targets in terms of liquidity (ii) allocates liquidity to the pillars.

To minimize its exposure to liquidity risk, the CIF implements the below Liquidity Risk Mitigation Strategies:

- Regular analysis & reporting to the Board of Directors on the funding needs of the Company.
- Monitoring of the Company's exposures and diversification to avoid rise of concentration risk as per the internal policies.
- Cash Management.

The Company has undertaken a specific review of its liquidity risks and believes that it is able to meet its upcoming maturities. As at 31 December 2017, the Company hold EUR333 thousand in its bank accounts.

Furthermore, the client assets held in fiduciary capacity (in segregated accounts) were **EUR4,986,905**. The Company is taking due care in safeguarding these assets and performs the following mitigation strategies:

- These assets are held by the Company in a fiduciary capacity and are not included in the Company's funds nor its financial statements.

- The funds are held in client segregated bank accounts.
- Frequent reconciliations are performed internally and also from the External Auditors which also are tasked to verify and submit to CySEC annual reports.

8. Compliance, Reputational and Legal Risks

Compliance risk (including legal and tax risks) corresponds to the risk of legal, administrative or disciplinary sanction, or of material financial losses, arising from failure to comply with the provisions governing the Company's activities.

Compliance means acting in accordance with applicable regulatory rules, as well as professional, ethical and internal principles and standards. Fair treatment of customers, with integrity, contributes decisively to the reputation of the Company.

By ensuring that these rules are observed, the Company works to protect its customers and, in general, all of its counterparties, employees, and the various regulatory authorities to which it reports.

Compliance System and Department

Independent compliance structures have been set up within the Company's different business lines around the world to identify and prevent any risks of non-compliance.

The Compliance Officer verifies that all compliance laws, regulations and principles applicable to the Company's services are observed, and that all staff respect codes of good conduct and individual compliance. The Compliance Officer also monitors the prevention of reputational risk and provides expertise for the Company, performs controls at the highest level and assists with the day-to-day operations. The Compliance Officer is responsible for:

- The Company's financial security (prevention of money laundering and terrorism financing; know-your-customer obligations; embargoes and financial sanctions)
- Developing and updating consistent standards for the function, promoting a compliance culture, coordinating employee training and managing Company regulatory projects
- Coordinating a compliance control mechanism within the Company (second-level controls), overseeing a normalised Compliance process, oversight of personnel operations and, finally, managing large IT projects for the function
- Preventing and managing conflicts of interest
- Proposing ethical rules to be followed by all Company employees
- Training and advising employees and raise their awareness of compliance issues
- Building and implementing steering and organisational tools for the function: Compliance and Reputational Risk dashboards, forums to share best practices, meetings of functional compliance officers

- Generally monitoring subjects likely to be harmful to the Company's reputation

8.1. Compliance Transformation Programme

In light with the changes arising from MiFID II, which will come into force from 2018 onwards, the Company will launch a programme from 2017 to 2018 to transform and improve the Compliance Function, in particular to raise the monitoring standards and better fulfil the increasing requirements of regulatory authorities.

Among other things, this programme will strengthen governance and increase the resources made available to the function, both by recruiting additional resources and by investing in streamlining the Compliance Function's existing IT applications and strengthening alert controls and management.

It targets the continued enhancement of priority functions, the central tools for monitoring regulatory application (including training, harmonisation, and regulatory oversight), financial security, constant oversight, customer protection, market integrity (including preventing conflicts of interest), and reporting quality.

8.2. Prevention of Money Laundering and Terrorism Financing

Money Laundering and Terrorist Financing risk mainly refers to the risk where the Company may be used as a vehicle to launder money and/or assist/be involved in financing terrorism.

The Company has in place, and is updating as applicable, certain policies, procedures and controls in order to mitigate the money laundering and terrorist financing risks. Among others, these policies, procedures and controls include the following:

- The adoption of a risk-based approach that involves specific measures and procedures in assessing the most cost effective and appropriate way to identify and manage the Money Laundering and Terrorist Financing risks faced by the Company
- The adoption of adequate Client due diligence and identification procedures in line with the Clients' assessed Money Laundering and Terrorist Financing risk
- Setting certain minimum standards of quality and extent of the required identification data for each type of Client (e.g. documents from independent and reliable sources, third party information)
- Obtaining additional data and information from Clients, where this is appropriate and relevant, for the proper and complete understanding of their activities and source of wealth and for the effective management of any increased risk emanating from a particular Business Relationship or an Occasional Transaction

[Disclosure and Market Discipline Report 2017](#)

- Monitoring and reviewing the business relationship or an occasional transaction with clients and potential clients of high risk countries
- Ensuring that the Company's personnel receive the appropriate training and assistance

The Company is frequently reviewing its policies, procedures and controls with respect to money laundering and terrorist financing to ensure compliance with the applicable legislation and incorporated, as applicable, any new information issued/available in this respect.

9. Appendix - Specific References to CRR

CRR Ref	High Level Summary	Compliance Reference
<i>Scope of disclosure requirements</i>		
431(1)	Requirement to publish Pillar III disclosures.	1.2
431(2)	Disclosure of operational risk information.	6
431(3)	Institution must have a policy covering frequency of disclosures. Their verification, comprehensiveness and overall appropriateness.	1.1
431(4)	Explanation of ratings decisions to SMEs upon request.	N/A
<i>Frequency of disclosure</i>		
433	Disclosures must be published once a year at a minimum, in conjunction with the date of publication of the financial statements.	1.2
<i>Means of disclosures</i>		
434(1)	To include disclosures in one appropriate medium, or provide clear cross-references to other media.	1.2
434(2)	Equivalent disclosures made under other requirements (i.e., accounting) can be used to satisfy Pillar III if appropriate.	1.2
<i>Risk management objectives and policies</i>		
435(1) (a)	Disclosure of information as regards strategies and processes, organisational structure of the relevant risk management function, reporting and measurement systems and risk mitigation/hedging policies	2, 4, 5 and 6
435(1) (b)		2, 4, 5 and 6
435(1) (c)		2, 4, 5 and 6
435(1) (d)		2, 4, 5 and 6
435(1) (e)	Declaration approved by the BoD on adequacy of risk management arrangements	Preface
435(1) (f)	Concise risk statement approved by the BoD	Preface
435(2)	Information, once a year at a minimum, on governance arrangements.	2
435(2) (a)	Number of directorships held by members of the BoD.	2.8
435(2) (b)	Recruitment policy of BoD members, their experience and expertise.	2.6
435(2) (c)	Policy on diversity of BoD members, its objectives and results against targets.	2.5
435(2) (d)	Disclosure of whether a dedicated risk committee is in place, and number of meetings in the year.	N/A
435(2) (e)	Description of information flow on risk to BoD.	2.9
<i>Scope of application</i>		
436(a)	Name of institution.	1.1
436 (b)	Difference on the basis of consolidation for accounting and prudential purposes, naming entities that are:	N/A

436 (b) (i)	Fully consolidated;	N/A
436 (b) (ii)	Proportionally consolidated;	N/A
436 (b) (iii)	Deducted from own funds;	N/A
436 (b) (iv)	Neither consolidated nor deducted.	N/A
436 (c)	Impediments to transfer of funds between parent and subsidiaries.	N/A
436 (d)	Capital shortfalls in any subsidiaries outside of scope of consolidation and their names (if any).	N/A
436 (e)	Use of articles on derogations from (a) prudential requirements or (b) liquidity requirements for individual subsidiaries / entities.	N/A
Own Funds		
437 (1)	Requirements regarding capital resources table	3.4
437 (1)		3.4
437 (1) (a)		3.4
437 (1) (b)		3.4
437 (1) (c)		3.4
437 (1) (d) (i)		3.4
437 (1) (d) (ii)		3.4
437 (1) (d) (iii)		3.4
437 (1) (e)		3.4
437 (1) (f)		3.4
437(2)	EBA shall develop implementation standards for points (a), (b), (d) and (e) above	N/A
Capital Requirements		
438(a)	Summary of institution's approach to assessing adequacy of capital levels.	2.9
438(b)	Result of ICAAP on demand from competent authority.	2.3
438(c)	Capital requirement amounts for credit risk for each Standardised approach exposure class (8% of risk-weighted exposure).	4
438(d)	Capital requirements amounts for credit risk for each Internal Ratings Based approach exposure class.	N/A
438(d) (i)		N/A
438(d) (ii)		N/A
438(d) (iii)		N/A
438(d) (iv)		N/A
438(e)	Capital requirements amount for market risk or settlement risk, or large exposures where they exceed limits.	5.1
438(f)	Capital requirement amounts for operational risk, separately for the basic indicator approach, the Standardised approach, and the advanced measurement approaches as applicable.	6.1

<i>Exposure to counterparty credit risk (CCR)</i>		
439(a)	Description of methodology to assign internal capital and credit limits for counterparty credit exposures.	N/A
439(b)	Discussion of policies for securing collateral and establishing reserves.	N/A
439(c)	Discussion of policies as regards wrong-way exposures.	N/A
439(d)	Disclosure of collateral to be provided (outflows) in the event of a ratings downgrade.	N/A
439(e)	Derivation of net derivative credit exposure.	N/A
439(f)	Exposure values for mark-to-market, original exposure, standardised and internal model methods.	N/A
439(g)	Notional value of credit derivative hedges and current credit exposure by type of exposure.	N/A
439(h)	Notional amounts of credit derivative transactions for own credit, intermediation, bought and sold, by product type.	N/A
439(i)	Estimation of alpha, if applicable.	N/A
<i>Credit Risk Adjustments</i>		
442(a)	Definitions for accounting purposes of 'past due' and 'impaired'.	N/A
442(b)	Approaches for calculating credit risk adjustments.	N/A
442(c)	Exposures post-value adjustments (before applying Credit Risk Mitigation and after applying credit conversion factors) by different types of exposures.	4.2
442(d)	Exposures post value adjustments (before applying Credit Risk Mitigation and after applying credit conversion factors) by significant geographic areas and material exposure classes.	4.2
442(e)		4.2
442(f)	Exposures post value adjustments by residual maturity and by material exposure class.	4.2
442(g)		N/A
442(g) (i)	Breakdown of impaired, past due, specific and general credit adjustments, and impairment charges for the period, by exposure class or counterparty type.	N/A
442(g) (ii)		N/A
442(g) (iii)		N/A
442(h)	Impaired, past due exposures, by geographical area, and amounts of specific and general impairment for each geography.	N/A
442(i)	Reconciliation of changes in specific and general credit risk adjustments.	N/A
442(i) (i)		N/A
442(i) (ii)		N/A
442(i) (iii)		N/A
442(i) (iv)		N/A
442(i) (v)		N/A

442 endnote	Specific credit risk adjustments recorded to income statement are disclosed separately.	N/A
<i>Unencumbered assets</i>		
443	Disclosures on unencumbered assets.	N/A
<i>Use of ECAI's</i>		
444(a)	Names of the nominated ECAIs used in the calculation of Standardised approach RWAs, and reasons for any changes.	4.1
444(b)	Exposure classes associated with each ECAI.	4.1
444(c)	Description of the process used to transfer the issuer and issue credit assessments onto items not included in the trading book;	4.1
444(d)	Mapping of external rating to credit quality steps.	4.1
444(e)	Exposure values pre- and post-credit risk mitigation, by credit quality step.	4.1
<i>Exposure to market risk</i>		
445	Disclosure of position risk, large exposures exceeding limits, FX, settlement and commodities risk.	5
<i>Operational Risk</i>		
446	Disclosure of the scope of approaches used to calculate operational risk, discussion of advanced methodology and external factors considered.	6
<i>Exposures in equities not included in the trading book</i>		
447(a)	Differentiation between exposures based on their objectives and overview of the accounting techniques and valuation methodologies used.	N/A
447(b)	Recorded at fair value and actual prices of exchange traded equity where it is materially different from fair value.	N/A
447(c)	Types, nature and amounts of the relevant classes of equity exposures.	N/A
447(d)	Cumulative realised gains and losses on sales in the period.	N/A
447(e)	Total unrealised gains or losses, latent revaluation gains or losses and amounts included in Tier 1 capital.	N/A
<i>Exposure to interest rate risk on positions not included in the trading book</i>		
448(a)	Nature of interest rate risk and key assumptions in measurement models.	N/A
448(b)	Variation in earnings, economic value, or other measures used from upward and downward shocks to interest rates, by currency.	N/A
<i>Remuneration Disclosures</i>		
450	Remuneration Policy	2.7
<i>Leverage</i>		
451(1) (a)	Leverage ratio and analysis of total exposure measure, including reconciliation to financial statements, and derecognised fiduciary items.	3.5
451(1) (b)		3.5
451(1) (c)		3.5

451(1) (d)	Description of the risk management process to mitigate excessive leverage and factors that had an impact on the leverage ratio during the year.	N/A
451(1) (e)		N/A
451(2)	EBA shall develop implementation standards for points above.	N/A
<i>Use of Credit Risk mitigation techniques</i>		
453(a)	Policies and processes, and an indication of the extent to which the CIF makes use of on- and off-balance sheet netting.	N/A
453(b)	Policies and processes for collateral valuation and management.	N/A
453(c)	Description of types of collateral used by the CIF.	N/A
453(d)	Types of guarantor and credit derivative counterparty, and their creditworthiness.	N/A
453(e)	Information about market or credit risk concentrations within the credit mitigation taken.	N/A
453(f)	For exposures under either the Standardised or Foundation IRB approach, disclosure of the exposure value covered by eligible collateral.	N/A
453(g)	For exposures under either the Standardised or Foundation IRB approach, disclosure of the exposure covered by guarantees or credit derivatives.	N/A
<i>Use of the Advanced Measurement Approaches to operational risk</i>		
454	Description of the use of insurance or other risk transfer mechanisms for the purpose of mitigating operational risk.	N/A
