Date last update 10/06/2019

Alert

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type

You are about to trade in a Contract for Difference (“CFD”) with the underlying instrument being Cryptocurrencies. A CFD is a tradable instrument which represents a contract between two parties to exchange the difference between the current price of an underlying instrument and its price on the day the agreement expires. CFDs are leveraged products, enabling investors to make transactions with only a small margin (deposit). The underlying instrument is never actually owned by you and the profit or loss is determined by the difference between the buying and the selling price of the CFD, minus any relevant costs (detailed below).

Underlying Asset

We may offer CFDs with on different underlying instruments. In this case it is a Cryptocurrency. The cryptocurrencies we currently offer as CFDs can be found in our Website. What are cryptocurrencies? - The most common cryptocurrencies are Bitcoin, Ethereum, Litecoin and Ripple. Cryptocurrencies are encrypted digital representation of value that function as a medium of exchange, a unit of account, and/or a store of value, do not have legal tender status in any jurisdiction and are traded on non-regulated decentralized digital exchanges.

So how do CFDs work?

When you enter into any order to Buy or Sell a CFD on one of our trading platforms, you trade with us as your counterparty. We are your Principal to each trade that you enter. Therefore, if your trade is profitable, we lose. If your trade is loss making, we earn a profit. Our profits or losses may be reduced by the level of hedging we may undertake to contain our trading risk. As an example – if you enter into a Buy trade for a CFD on Bitcoin Cash when the underlying price of Bitcoin Cash is USD 700, we will ask you to place a margin with us to enable you to trade. If the margin is say 1:2, this means that as a minimum you will need to place USD 350 with us. If the price of Bitcoin Cash goes to USD 750, you will profit USD 50, minus any relevant costs (detailed below). If it reduces to USD 650, you will lose USD 50, plus any relevant costs (detailed below). Depending on whether we apply any notifications when your account is close to margin calls, we may ask you for more money to ensure your trade / position remains open, otherwise we may be forced to close your position. You will never lose more than the Equity of your trading account as we offer Negative Balance Protection (NBP) to you.

For more information, please refer to our Order Execution Policy.

Objectives

By trading a CFD you gain an indirect exposure to the underlying financial instrument without owning it. Through your trading with us, you receive by us exposure to the performance of the underlying asset, but you do not receive any ownership or other rights to such underlying asset. This product is appropriate only for speculative investment purposes. This is because cryptocurrencies are a relatively new type of instrument, remain to be unregulated by most Financial Authorities and in the European Union are not, at the date hereof, covered by the Markets in Financial Instruments Directive.

Intended retail investor

Trading in this product is highly speculative and involves a significant risk of loss. This product is for clients with a relatively short-term investment horizon, and is not suitable for all investors but only for those who i) understand and are willing to bear the risks involved, including the risks associated with margin trading; ii) possess the necessary experience and knowledge about trading in derivatives and the underlying instruments; and iii) are financially able to bear the risk of a total loss of their invested amounts, subject to the negative balance protection mechanism offered by the Company.

Trading in CFDs on Cryptocurrencies carries high level of risk and thus can generate great profits as well as great losses. You should never invest more than you are willing to lose, as it is possible to lose all your initial investment. Prior to commencing trading in CFDs on Crypto it is prudent to consult with this KID and evaluate whether trading in CFDs on Cryptocurrencies is appropriate for you.

Term

CFDs on Cryptocurrencies generally have no maturity date or a minimum holding period and therefore you decide when to open and close your position. Also, as per regulation we are required to close one or more of a retail investor’s open CFD positions when the sum of funds in the CFD trading account and the unrealised net profits of all open CFDs connected to that account falls to less than half of the total initial margin protection for all those open CFDs.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk				Higher Risk		
Typically lower rewards				Typically higher rewards		
1	2	3	4	5	6	7

Signification of the indicator

This indicator measures the level of risk at which your investment may be exposed. The risk category is not guaranteed and may shift over time. The lowest category does not mean «risk-free».

The CFDs on Cryptocurrencies display a grade of 7 on a scale ranging from 1 to 7 (1 being the less risky category). They therefore exhibit (because also of volatility) the highest risk characteristics.

This product does not include any protection from future market performance so you could lose all of your investment. The Client could place Stop Loss order to limit potential losses and/or Take Profit order to collect profits.

If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from the Investor Compensation Fund (see the section ‘what happens if we are unable to pay you’).

The indicator shown above does not consider this protection.

General CFD Risks

- CFDs are complex financial instruments and are traded Over the Counter (“OTC”). You can only exit a position by trading with us, during the trading hours of the underlying asset as stated on our Website. You cannot transfer your open positions/trades to any other firm. It may be impossible to liquidate an existing position, to assess the value of the position arising from an off-exchange transaction or to assess the exposure to risk.
 - You do not owe the underlying asset. Through your trade with us, you receive by us exposure to the performance of the underlying asset, but you do not receive any ownership or other rights to such underlying asset.
 - CFDs are leveraged products. You need a small margin for getting exposure to the underlying asset. Leverage can magnify both your profits as well as your losses.
 - Statistically, because of leverage, a significant part of clients loses because leverage amplifies losses, leading to margin calls and closures of clients’ open positions. We operate a Negative Balance Protection i.e. you cannot lose more than the Equity of your trading account, however you risk losing the capital invested with us.
 - CFD trading is undertaken on electronic platforms. There may be times that system or other breakdowns arise. This may affect your ability to trade, or our ability to offer continuous prices or create a need for subsequent adjustment of prices to reflect underlying exchange prices.
 - CFDs on certain assets can be highly volatile. The prices of CFDs and the underlying assets may fluctuate rapidly and over wide ranges and may reflect unforeseeable events or changes in conditions, none of which can be controlled by us. Under certain market conditions it may be impossible for a Client’s order to be executed at the declared price leading to losses.
 - Prices of CFDs as well as their commercial terms like the spreads maybe varied to reflect periods of actual or expected heightened market volatility.
 - Depending on the currency your trading account is denominated and the currency of the underlying asset you trade, your final return maybe exposed to the exchange rate risk between the two currencies.
 - The tax legislation of your home Member State may have an impact on your return.
- The above list of risks is non-exhaustive. For the Company’s Risk Disclosure Policy please visit the Company’s Website.

Cryptocurrencies specific risks

CFDs on Cryptocurrencies can be generally affected by:

- Cryptocurrencies are traded on non-regulated decentralized digital exchanges. This means that the price formation and price movements of the Cryptocurrencies depend solely on the internal rules of the particular digital exchange, which may be subject to change at any point in time and without notice, including the implementation of trading suspensions or other actions. At the date hereof, only two USA regulated exchanges have introduced Futures on certain cryptocurrencies, the CBOE and the CME.
- Cryptocurrencies are exposed to high intra-day price volatility, which may be substantially higher compared to other Financial Instruments.
- Because of the high market volatility, we reserve the right to change trading terms (such as spreads, charges, and leverage ratios) at more regular intervals than for trading on CFDs for other instruments. Furthermore, the level of such spreads and other costs is significantly higher than for other instruments.

Performance Scenarios

The performance scenarios represent general situations of changes in the prices of CFDs on specific Crypto Currency and its impact on the return of the Client’s investment in monetary and percentage terms. These scenarios are general and applicable to the range of CFDs on Crypto Currencies offered by the Company. The example below involves Buying 0.2 lot (“Volume”) on Bitcoin Cash, with Contract Size of 100 when its Price is USD 300.00, using leverage 1:2. In this case, margin required for this transaction is: $\text{Volume} * \text{Contract Size} * \text{Price} / \text{Leverage} = 0.2 * 100 * 300 / 2 = 3,000.00 \text{ USD}$

Long	Invested (USD)	Open Price	Close Price	One day Swaps	Net Profit/Loss (USD)	% change in equity
Favourable	3000.00	300.00	320.00	-10	390	13%
Moderate	3000.00	300.00	307.50	-10	140	5.00%
Unfavourable	3000.00	300.00	270.00	-10	-610	20%
Stress	3000.00	300.00	240.00	-10	-1200.10	40%

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance and are not exact indicators. Your profits and losses will vary depending on how the underlying market performs and how long you keep the position open. The figures shown assume that USD is your base currency. The figures do not take into account your personal tax situation, which may also affect how much you can make. This performance scenario assumes you only have one position open, and does not take into account the negative or positive cumulative balance you may have if you have multiple open positions with us.

What happens if the Company is unable to pay out?

For CFDs on underlying instruments other than cryptocurrencies, in case of our financial default you may seek compensation from the Investor Compensation Fund (“ICF”) of Cyprus Investment Firms. The maximum compensation is Euro 20,000. ICF Rules apply, including with respect to your categorization and eligibility. In general, retail clients are covered by the ICF.

Fees and Charges

- The charges you pay are used to cover the costs of our operational activities, including the costs of obtaining market / price data from the underlying exchanges, the staff costs, our regulatory license costs, our funding costs as well as the marketing and distribution costs.
- We may also have trading gains from the trades that you enter with us.
- We do not pay any interest on any clients’ money you may have in your account with us.
- Please consult your own advisor to understand the nature of our below costs and charges:

One-off Cost at the time of your trade	Spreads	Spread is the difference, usually indicated in pips, between the Bid and Ask price and reflects, in part, the spread of the underlying cryptocurrency. The spread values vary for different accounts and depends on the volatility and liquidity of the underlying cryptocurrency. Please refer to our Website for more information on the spreads cost of which may be substantial.
On-going costs	Swaps	Swaps are the fees for keeping the position opened over-night. Swaps for the opened positions are calculated at 23:59:59 – 00:00:00 (EET), Monday to Friday. These are ongoing fees for as long as you have open trades with us. Swap rates are based on market interest rates, which may vary from time to time and are subject to changes according to Company's liquidity providers' rates. For positions held open over Friday, a triple swaps charged from Friday to Monday night as it includes the charges for the weekend. Swap rates for different instruments can be found on our Website . <u>Please see our swap calculation formula below:</u> Number of lots x Contract size x Swap rate x Number of nights = Swap value. Example: 1 x 1000 X -0.00128 x 3 = -3.84
Incidental cost	Inactivity fee	Inactivity fee is charged after the inactivity of 1 months: 15 USD or equivalent in other currency per month.
	Currency conversion rates	Investing in CFDs with an underlying asset listed in a currency other than your base currency entails a currency risk, due to the fact that when the CFD is settled in a currency other than your base currency, the value of your return may be affected by its conversion into the base currency.

How long should I hold it and can I take money out early?

- You can only exit an open trade by entering a closing trade, only with us, during the trading hours of the market of the underlying asset being made available by us on our Website
- This product generally has no fixed term and you decide when to close your position. You should monitor the product to determine when the appropriate time is to close your position(s). If your margin level reaches or falls below the Margin close out level of 50% your position will start liquidating, without notice by us to you, starting with the highest losses.
- You can request to withdraw your money at any time. We will process all withdrawal requests within 24 hours irrespective of payment method.

How can I complain?

You are entitled to submit a complaint at any time, where you may feel that our service has not met your satisfaction.

Where any trading or other query has not been addressed or when you wish to submit a formal complaint at the initial or a subsequent stage, you can do so by completing the Online Complaint Form.

If you are not satisfied with our response to your complaint you can refer your complaint to the Financial Ombudsman of the Republic of Cyprus. For more information please visit <http://www.financialombudsman.gov.cy>
